

Quarterly Report #4: February 2022

Presented by the Cosmic Citizens Committee
of Now Creations

The intention of the CCC is to provide Now Creations members with education related to this important and ever-emerging topic. It is in that spirit that this information is provided.

Dear Members of Now Creations,

It's been an exciting time in the Cosmos! On December 25, 2021, the James Webb Space Telescope (JWST) lifted off from French Guyana on a 30 day journey toward a destination nearly one million miles from Earth. When fully operational later this year, this amazing machine will begin collecting images from the very beginning of the known physical universe -- nearly 14 billion years ago. Scientists expect the information collected from the JWST may rewrite our understanding of the formation of stars, and galaxies, and may provide key insights to the beginning of life on Earth, and possibly other worlds. If you care to know more about JWST, below is a link to an excellent story.

[**Link to James Webb Space Telescope Story**](#)

On another note, did you know the Vatican (yes, the Vatican) maintains a large and complex system of telescopes and observatories around the world? Perhaps their most significant observatory location is on Mount Graham, near Safford, Arizona. This may seem ironic in light of the Vatican's persecution of Galileo Galilei (inventor of the modern telescope) in the 1600's. This was just one interesting item that was part of the discussion during the last Now Creations "Cosmic Citizens Committee" (CCC) meeting.

Perhaps the most notable quality of the CCC is the diverse areas of interest and expertise each member brings to the group. The fact is, the exploration of the Universe and our place in it, as souls, humans, or just as living organisms is a vast and varied undertaking! During our last meeting, this exciting variety of interests became clear. Many of us shared our favorite books, movies, videos and other resources which have served to educate, inspire and fuel our curiosity about the mysteries of the Universe, our roles as Cosmic Citizens, and our connection to Source.

To that end, we thought it would be helpful to the larger Now Creations membership to provide a list of materials which might be of interest to those who wish to explore further. This list is by no means exhaustive. In fact, you may find that each book or video will lead to other meaningful resources.

These resources cover myriad aspects of Cosmic Citizenship, from UFO's, to profoundly spiritual experiences. As you explore, you may find you're drawn to one area more than another. Or you may find all of these areas exciting and worthy of your time and attention.

Videos/Movies:

Unidentified: Inside America's UFO Investigation (History Channel, 8 episodes)

Inside the Milky Way (National Geographic) 1 hour, 15 minutes

Black Hole Apocalypse (NOVA) 2 hours, 30 minutes

The Universe (History Channel) 11 hours over several episodes - ** Vince highly recommends

The Phenomenon (documentary by James Fox)

Undisclosed (documentary by Dr. Stephen Greer)

Close Encounters of the 5th Kind (documentary by Dr. Stephen Greer)

The Phoenix Lights (documentary by Dr. Lynne Kite)
Bob Lazar: Area 51 and Flying Saucers (documentary by Jeremy Corbell)
**John highly recommends
Initiation (Gaia Network - Matias di Stefano)
Earth from Space (PBS, 2 hours) **Vince highly recommends
How The Universe Works (nine seasons - Science Channel)

Books:

UFOs: Generals, Pilots, and Government Officials go on the Record (Leslie Kean)
Chariots of the Gods (Erich von Daniken)
A CE 5 Handbook (Cielia Hatch)
Living the Noetic Life (available through The Institute for Noetic Science - "IONS")
Noetic Science: Exploring the Power of Collective Consciousness (available through IONS)
The Noetic Universe (available through IONS)
Inviting ET (by Su Walker)

Websites:

Institute for Noetic Sciences (www.noetic.org)
The Black Vault (www.blackvault.com)
Vatican Observatory (vaticanobservatory.va)

Podcast:

Somewhere in the Skies, hosted by Ryan Sprague

Again, these resources may serve as a starting point, but are only a small representation of the very large and diverse materials available. Also, it's worth noting that many of the books and videos listed above may now only be available through various streaming services, or Amazon.

Namaste,
Vince
