

April 2024

Thought for the month: I am a Leader in the Evolution of Consciousness for Love and Kindness.

1. "What do you think about evolution? Is evolution real?"
2. Why do you ask?
3. "Well, it seems like everything in life is changing/evolving."
4. You made "changing" and "evolving" synonymous.
5. "Well, aren't they the same?"
6. Things "change" for better for worse.
7. When things evolve, it means that they are advancing.
8. "That's an interesting distinction you made."
9. "I knew you would help me to think more exactly."
10. Yes, for example, your body is changing, but not necessarily for the better.
11. Or, society changes, but not necessarily for the better.
12. Or, even Life seems to be changing, but not necessarily for the better.
13. "Are you saying that we are not evolving?"
14. Oh, no. I think that we are evolving, but you have to first know where to look.
15. And, again, changing is not the same as evolving.
16. "Okay, I understand. So, where do you think that we are evolving?"
17. I think that we are evolving in "Consciousness".
18. I think that we know that we can become more Loving and Kind.
19. "Yes, but not everyone is becoming more loving and kind."
20. You're right. You see, not everyone is evolving in Consciousness.
21. Some people are changing, but not evolving.
22. "I never thought about evolution in this way."
23. "I thought that everyone would evolve together."
24. Eventually, we will, but some people have to lead the evolution in Consciousness.
25. "I know what you are going to ask me." What?
26. "Am I a leader in the evolution of Consciousness to be more Loving and Kind?"
27. "You have a way of helping me to 'evolve'."
28. Well, what do you say? Would you like to be a leader in the evolution of Consciousness?
29. "Of course I would, and I will."
30. Somehow, I knew you are able to be such a leader.
